

# AGEC 315: Agriculture in an Emerging Economy

## Course Information

**Class days:** Tuesdays

**Class times:** 3:30 p.m. – 5:30 p.m.

**Course website:** <http://www.montana.edu/bekkerman/agec315s11.html>

## Course Description

This course is intended to introduce students to issues relevant to agriculture within a global context. Students will learn about agricultural production, transportation, markets, and policies affecting domestic and international agricultural sectors. Specifically, this course will help provide a better understanding of how these issues affect agriculture in emerging economies.

## Class Expectations

Successful completion of this course requires that students satisfy the following three criteria:

1. Complete a research paper on a topic relevant to Ukrainian agriculture. The topic may be commodity specific or more general, but it must integrate information relevant to both the science and economics related to the topic. For example, a research paper may examine the prevalence and costs associated with wheat diseases in Ukraine. Relevant due dates related to the research paper are provided in the course outline.
2. Attend and participate in every class session. If you know that you have an academically relevant scheduling conflict (e.g. job interview), you must let the instructors know *at least* one week in advance.
3. Prepare and present information related to a selected topic about Ukraine. Topics will be provided by the instructors and each student will choose to present information about one of these topics.

## Class Schedule

The outline of topics and lecturers is provided below. Because time conflicts may occur, some topics and lecturers may be rescheduled.

Course Outline		
Date	Topic	Speaker
January 18	Organizational overview
